WHAT STUDENTS ARE SAYING...

This is my second master’s with Florida Tech. I’ve been able to take classes in areas I knew very little about but interested me because there are lots of opportunities to expand your knowledge outside your degree through electives.”
— Mark D., Human Resources Management

“Irr professsors not only cover the material, they also reference specific examples in their careers to help reinforce what they are teaching out of the textbook.”
— Ray S., M.S. Project Management

MESSAGE FROM THE FIT ORLANDO SITE DIRECTOR

In today’s fast-moving, technology-driven global economy, the burden falls on the working professional to keep up with the constant change to remain competitively marketable and employable, and to pursue career promotions and opportunities for growth and advancement.

Education is the currency of the 21st century. It is the key to enhancing the professionals’ current job performance, to improving their abilities to meet the demands of new and future-oriented positions, and to increasing their firms’ capabilities to achieve organizational goals and business objectives.

Our model “High Tech with a Human Touch,” reflected in the personal connection between faculty, staff and students, differentiates us in the learning experience, in the academic setting and in the individualized attention given to our students. Our graduates and alumni have distinguished careers ranging from astronauts and scientists to four-star generals and leaders on Wall Street.

For the working professional with a busy schedule, program flexibility and convenience are crucial to graduation. Our programs can be pursued on a part-time or full-time basis, and each course meets on campus once a week to minimize logistics. I invite you to visit our campus, or call us to schedule an in-person or telephone academic advising appointment to learn more about our program offerings.

Dr. Nick Daher
