The Master of Business Administration (MBA) with a specialization in cybersecurity is a field of study that analyzes the theory and application of business and management principles with a focus on cybersecurity. MBA students gain comprehensive knowledge of business administration with a focus on the interconnections between security solutions and enterprise, aspects of host-based computer security, and secure networks and communication. Students expand their depth of knowledge on the inter-relatedness of business functions with executive decision-making and corporate leadership.

**Why a Cybersecurity MBA at Florida Tech?**

An MBA with a specialization in cybersecurity from Florida Tech equips students with the knowledge, critical thinking and leadership skills necessary to solve complex business situations applicable to any industry. At Florida Tech, students don’t just read about business administration and cybersecurity theory, they put it into practice through real-world management consulting projects as well as through various strategic business proposals, marketing plans, financial reports and cyber issues created in partnership with local businesses. Students who pursue their MBA benefit from expanded job opportunities and advancement in management roles as well as enhanced marketability in the public and private workforce.

**Military Friendly**

For over 40 years, Florida Tech has been committed to educating military service members—serving bases across the country, including Aberdeen Proving Ground, Fort Detrick, Fort Eustis, Fort Lee, Patuxent River Naval Air Station, Redstone Arsenal and Quantico Marine Corps Base. According to G.I. Jobs, Florida Tech is among the top 15% of military-friendly colleges, universities and trade schools. Our graduates include thousands of active duty and veteran service members, military contractors as well as 46 generals and five astronauts.

**Student Success**

At Florida Tech, students benefit from small class sizes taught by expert faculty focused on student success. Our students are typically adult learners working in their field of study and come from the military, government and private sector. This affords students the opportunity to study with fellow, professional practitioners and exchange ideas and concepts.

**Consulting Experience**

Select students engage in a semester-long project involving market research, analysis and customer discovery for real clients. Students gain valuable experience and employment potential.
Faculty
In addition to their doctoral degrees and extensive teaching experience, our faculty members’ experience spans multiple industries and positions, including project management, consulting, engineering, investing and marketing. Many of the faculty have an entrepreneurial background and are actively engaged in the community, serving as consultants and advisory board members. The Florida Tech faculty plays a vital role in the mission of the Nathan M. Bisk College of Business Department of Extended Studies—“We Prepare Exceptional Leaders.”

Careers
Students who graduate with a master’s degree in business administration are likely to find careers in executive leadership roles in areas such as:
